SSD M B Installtion

This chapter will guide you through a few simple steps to use the device.

Note, when installing the product, you should try to avoid skin contact with the electronic components.

Because electricity can cause damage to the product.

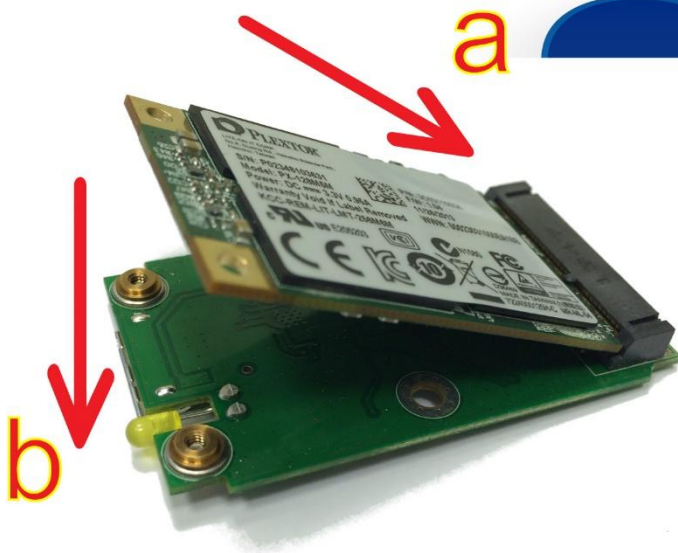

Step1:

Release the screws on the SSD box LED side.

Step2:

Pull out the PCB board.

Step3:

- a. Tilted 30 degrees into the slot.
- b. Push down.

Step4:

Clockwise to lock into the screw.

Step5:

Push the PCB board into SSD box, make sure the board align to the second track rails

In the end, you just need to lock the step1's screws back,
Then you can enjoy your SSD mess storage.
